Letter of Reference for Servcon Incorporated

To whom it may concern,

We commissioned Servcon Inc. to remove and reconstruct a public sidewalk over an existing Toronto Hydro electrical vault at our facility located at 6 Adelaide Street East, Toronto. The value of this project was \$96,300.

Servcon worked directly with our structural engineers, the City of Toronto and our design consultants to complete this work in a professional manner. The logistics of completing this work were very challenging; however, the project was delivered on time, on budget, with little or no disruption to our tenants, and no deficiencies reported upon final inspection.

I strongly recommend Servcon for any project you may have.

Yours truly,
Shazan Ali

Property Manager
