Letter of reference: Servcon Inc.

To whom it may concern:

This letter is to confirm that in April 2008, Servcon successfully completed a major structural upgrade and interior build out of a Purolator distribution facility located at 324 Burritt Street, Stratford Ontario. The value of this project was in excess of \$368,000. Servcon handled the structural design, architectural drawings, permits and construction for us. The structural work was very complex and Servcon was given a very short time line to have this work completed.

I was very pleased with their work, professionalism, and their ability to complete this challenging project on time. I would not hesitate to recommend Servcon for their competence and professionalism; and we'll certainly use them again when the need arises.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Carmine Mastrocola', with a stylized flourish at the end.
